COME LEGGERE LE TAVOLE RICAMBIO

All'interno di questo documento sono presenti le tavole di ricambio.
Per consultarle correttamente leggere la legenda qui sotto riportata:

1. NUMERO DI DOCUMENTO - VERSIONE: identifica il numero di documento e la versione della tavola ricambi rappresentata.
2. NUMERO DELLA TAVOLA: identifica il numero rappresentativo dei gruppi principali nei quali è stata suddivisa la macchina.
3. TITOLO DELLA TAVOLA: identifica il titolo della tavola rappresentata.
4. POS: identifica la posizione del particolare all'interno della tabella dei codici.

5. : riporta il simbolo grafico che permette di identificare se il particolare ad esso associato è un assieme composto da più elementi oppure se è un singolo elemento.

NOTA BENE:

↓	indica che il particolare ad esso associato è un assieme composto da più particolari.
↑	indica che il particolare ad esso associato fa parte di un assieme.

6. POS: identifica la posizione del particolare all'interno della tabella dei codici.

NOTA BENE: se il numero è contrassegnato con il simbolo "." esso identifica un particolare che assieme ad altri particolari compongono un assieme.

↓	1	in questo caso la posizione identifica un assieme (Liv-01) composto da più particolari.
↑↓	1.1	in questo caso la posizione identifica un particolare (Liv-02) dell'assieme superiore, ma esso è anche un assieme composto da più particolari.
↑↑↑	1.1.1	in questo caso la posizione identifica un particolare (Liv-03) dell'assieme intermedio (Liv-02).

NOTA BENE: se il numero è contrassegnato con il simbolo "*" esso identifica un particolare obsoleto.

7. TECHNICAL NEWS: riporta il numero di documento di una technical news dove vi è descritta una modifica tecnica associata al particolare.

8. SERIAL NUMBER: riporta il numero di serie della prima macchina prodotta con la modifica tecnica riportata nella technical news associata.

NOTA BENE:

→123456789	Se la freccia è posizionata prima del numero di serie, indica che il particolare ad esso associato è valido fino alla matricola riportata.
123456789→	Se la freccia è posizionata dopo del numero di serie, indica che il particolare ad esso associato è valido dalla matricola riportata.
123456789 → 123456789	Se la freccia è posizionata fra due numeri di serie, indica che il particolare ad esso associato è valido solo per un lasso temporale identificato fra le due matricole indicate.

9. CODICE: identifica il riferimento numerico con il quale viene identificata la parte di ricambio ad esso associato.

10. Q.TÀ: identifica la quantità della parte di ricambio utilizzata per il gruppo illustrato.

11. DENOMINAZIONE: identifica il nome con cui viene identificato il gruppo rappresentato nella tavola ricambi.

DESCRIPCION: identifica la descrizione in lingua ESP della parte di ricambio ad essa associata.

DESCRIPTION: identifica la descrizione in lingua FRA della parte di ricambio ad essa associata.

DENOMINATION: identifica la descrizione in lingua ENG della parte di ricambio ad essa associata.

DESCRIZIONE: identifica una descrizione più dettagliata in lingua ITA della parte di ricambio ad essa associata.

12. FINESTRA LENTE D'INGRANDIMENTO: permette di visualizzare i ricambi disponibili relativi al particolare evidenziato.

i **NOTA BENE:** i suddetti componenti verranno rappresentati come singoli elementi facente parte di un assieme, quindi saranno identificati con il simbolo ".".

13. FINESTRA TEMPORALE: permette di visualizzare i particolari resi obsoleti da una modifica tecnica.

i **NOTA BENE:** per agevolare la lettura della finestra temporale in essa è riportata anche il numero di serie inerente alla modifica rappresentata, comunque nella tabella dei codici è possibile visionare nella colonna TECHNICAL NEWS il numero di documento dove viene spiegata la modifica.

TARGA MATRICOLA

Le descrizioni contenute nella presente pubblicazione non si intendono impegnative.

L'azienda pertanto, si riserva il diritto di apportare in qualunque momento, le eventuali modifiche ad organi, dettagli, forniture di accessori, che essa ritiene convenienti per un miglioramento o per qualsiasi esigenza di carattere costruttivo o commerciale.

La riproduzione anche parziale dei testi e dei disegni, contenuti nella presente pubblicazione, è vietata ai sensi di legge. L'azienda si riserva il diritto di apportare modifiche di carattere tecnico e/o di dotazione.

Le immagini sono da intendersi di puro riferimento e non vincolanti in termini di design e dotazione.

Il catalogo ricambi è costituito da una serie di illustrazioni e dai relativi elenchi delle parti di ricambio.

Le illustrazioni rappresentano le parti di ricambio per ciascuno dei GRUPPI PRINCIPALI, nei quali è stata suddivisa la macchina.

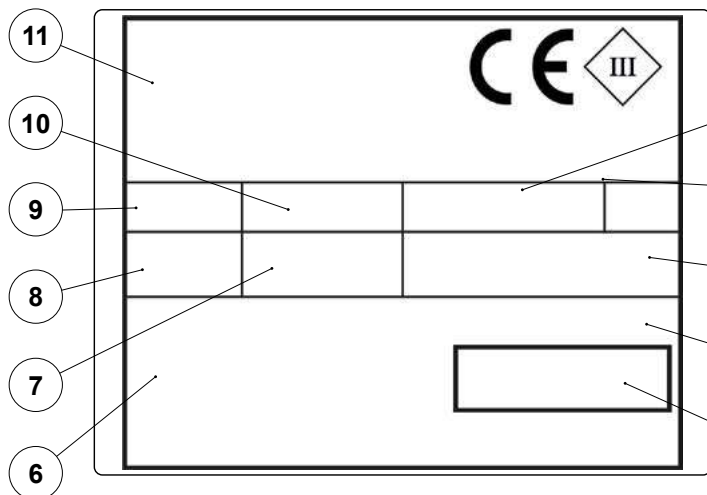

I gruppi principali, sono a loro volta, suddivisi in FIGURE e le figure in una o più ILLUSTRAZIONI o ELENCHI.

Ogni illustrazione è contraddistinta da un numero progressivo e dalla denominazione del gruppo illustrato (ex. CR-01 GRUPPO BASAMENTO).

Nell'illustrazione tutte le parti di ricambio sono identificate mediante un numero di posizione.

AVVERTENZA: si consiglia, nella sostituzione di ricambi, di usare esclusivamente RICAMBI ORIGINALI. Si consiglia di non attendere che i componenti siano logori dall'uso, sostituire un componente al momento opportuno, significa un migliore funzionamento della macchina e contemporaneamente un risparmio dovuto al mantenimento di una macchina efficiente.

La targa matricola è posizionata sulla macchina, in essa sono riportate le caratteristiche generali della macchina in particolare il numero di serie della macchina. Il numero di serie è un'informazione molto importante che deve essere sempre fornita congiuntamente ad ogni richiesta di assistenza o di acquisto ricambi. Nella targa matricola possiamo leggere le seguenti indicazioni:

1. Il valore espresso in Kg del peso delle batterie di alimentazione della macchina.
2. Il grado di protezione IP della macchina.
3. Il valore in Kg del peso lordo della macchina.
4. Il codice identificativo della macchina.
5. Il numero di serie della macchina.
6. Il nome identificativo della macchina.
7. Il valore espresso in W della potenza nominale assorbita della macchina.
8. Il valore espresso in % della massima pendenza

affrontabile in fase di lavoro.

9. L'anno di produzione della macchina.

10. Il valore espresso in V della tensione nominale della macchina.

11. Il nome commerciale e l'indirizzo del produttore della macchina.

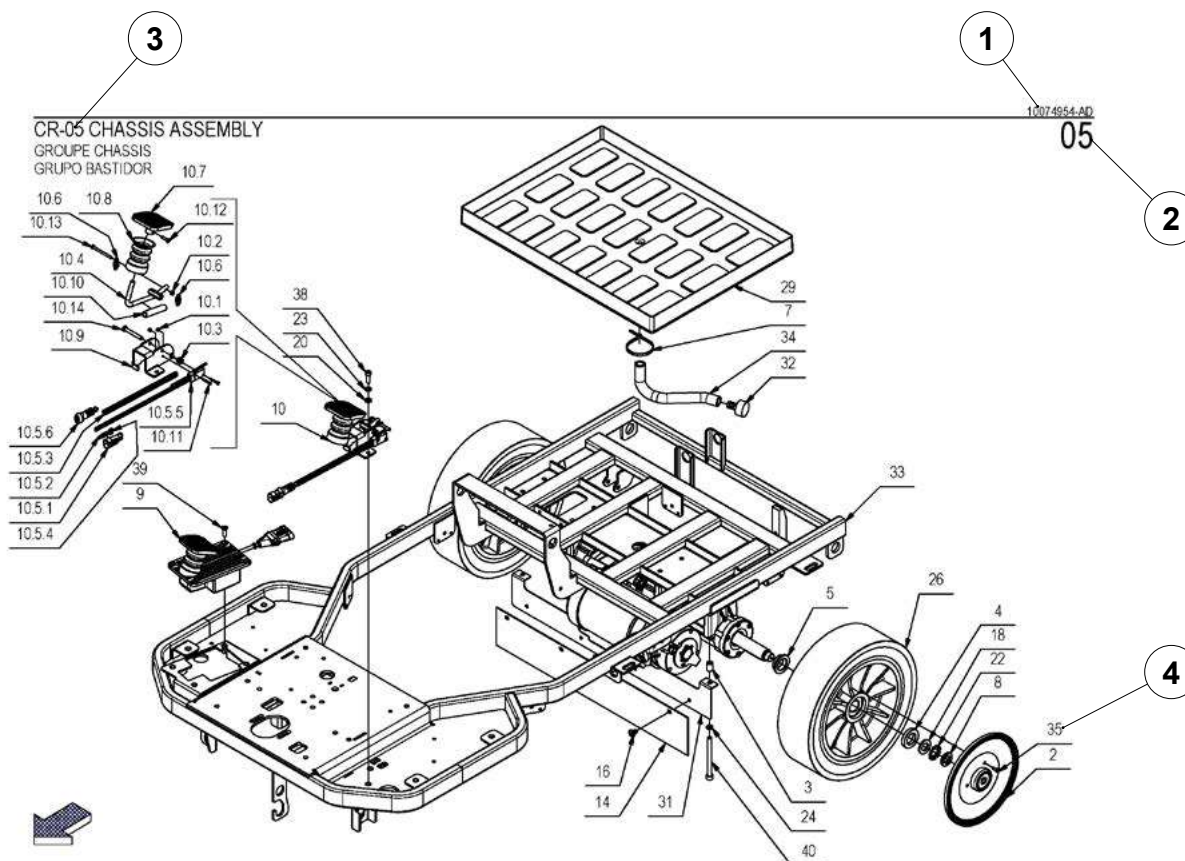

ATTENZIONE: è assolutamente vietato asportare o manomettere la targa matricola.

HOW TO READ THE SPARE PARTS TABLES

This document contains the spare parts tables.

In order to read these correctly, please refer to the key below:

1. DOCUMENT NUMBER - VERSION: identifies the document number and version of the spare parts table shown.
2. TABLE NUMBER: identifies the number which represents the main units into which the machine has been divided.
3. TABLE TITLE: Identifies the title of the table presented.
4. POS: identifies the position of the part within the table of codes.

5. : the graphic symbol that identifies whether the part in question is an assembly made up of several components, or whether it is a single, stand-alone element.

 **N.B. :**

↓	indicates that the part in question is an assembly made up of several components.
↑	indicates that the part in question is a component in an assembly.

6. POS: identifies the position of the part within the table of codes.

 **N.B. :** if the number is marked with the symbol ".", this denotes a part that (together with other parts) make up an assembly.

↓	1	in this instance, the position identifies an assembly (Liv-01) composed of multiple parts.
↑ ↓	1.1	in this instance, the position identifies a part (Liv-02) of the larger assembly, but this is also an assembly composed of multiple parts.
↑ ↑ ↑	1.1.1	in this instance, the position identifies a part (Liv-03) of the intermediate assembly (Liv-02).

 **N.B. :** if the number is accompanied by the "*" symbol, this identifies an obsolete part.

7. TECHNICAL NEWS: the document number for the technical news document in which the technical modification associated with the part is described.

8. SERIAL NUMBER: the serial number of the first machine produced with the technical modification reported in the relevant technical news document.

 **N.B. :**

→123456789	If the arrow is placed before the serial number, it indicates that the part in question is valid up to the serial number displayed.
123456789→	If the arrow is placed after the serial number, it indicates that the part in question is valid from the serial number displayed.
123456789 → 123456789	If the arrow is positioned between two serial numbers, it indicates that the part associated with it is valid only for the time period identified between the two serial numbers indicated.

9. CODE: identifies the numerical reference used to identify the spare part in question.

10. Q.TY: identifies the quantity of the spare part used for the unit in the illustration.

11. NAME: the name used to identify the unit referred to in the spare parts table.

DESCRIPCION: identifies the SPANISH language description associated with the spare part in question.

DESCRIPTION: identifies the FRENCH language description associated with the spare part in question.

DENOMINATION: identifies the ENGLISH language description associated with the spare part in question.

DESCRIZIONE: identifies a more detailed ITALIAN language description associated with the spare part in question.

12. MAGNIFYING GLASS WINDOW: enables the available spare parts related to the highlighted part to be viewed.

i **N.B. :** the above-mentioned components will be represented as single elements that are part of an assembly, and as such, they will be identified with the symbol ".".

13. TIME WINDOW: allows parts made obsolete by a technical change to be viewed.

i **N.B. :** in order to facilitate the reading of the time period, this also contains the serial number inherent to the modification in question; however, the TECHNICAL NEWS column in the table of codes displays the document number where the modification is explained.

SERIAL NUMBER PLATE

The descriptions contained in this document are not binding.

The company therefore reserves the right to make any modifications at any time to elements, details, or accessory supply, as considered necessary for reasons of improvement or manufacturing/commercial requirements.

The reproduction, even partial, of the text and drawings contained in this document is prohibited by law. The company reserves the right to make any technical and/or supply modifications.

The images are for reference purposes only, and are not binding in terms of design and supply.

The spare parts catalogue consists of a series of illustrations and corresponding lists of spare parts.

The illustrations represent the spare parts for each of the MAIN UNITS into which the machine is divided.

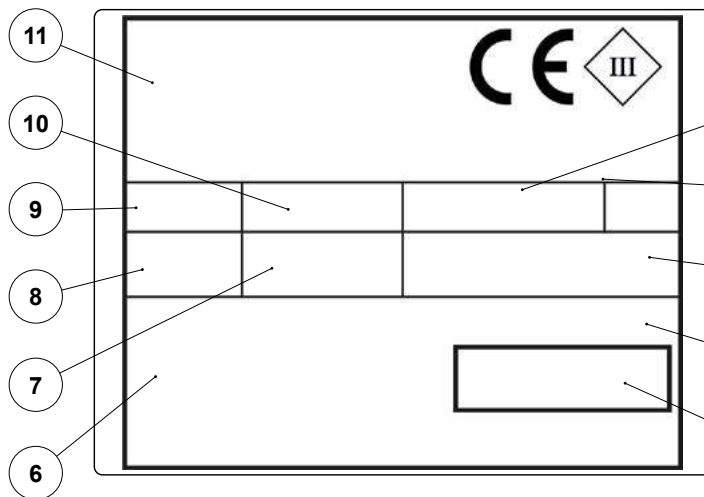

These main units, in turn, are divided into FIGURES, and the figures are divided into one or more ILLUSTRATIONS or LISTS.

Each illustration is identified by a sequential number, and by the name of the unit that features in the illustration (e.g. CR-01 BRUSH HEAD UNIT).

In the illustration, all the spare parts are identified by a position number.

WARNING: when replacing machine components, we recommend using only ORIGINAL SPARE PARTS. We recommend not waiting until components are worn out through use; replacing a part in a timely manner results in better operation of the machine, and in addition, maintaining an efficient machine also leads to time and cost savings.

The serial number plate is located on the machine itself, and indicates the general characteristics thereof, specifically the serial number of the machine. The serial number is a very important piece of information and should always be provided together with any request for assistance or when purchasing spare parts. The serial number plate contains the following information:

1. The weight of the batteries that power the machine (expressed in kg).
2. The IP protection rating of the machine.
3. The gross weight of the machine (expressed in kg).
4. The machine ID code.
5. The machine serial number.
6. The machine ID name.
7. The nominal power consumed by the machine (expressed in W).

8. The maximum grade that the appliance can handle during work activities (expressed in %).

9. The year of machine manufacture.

10. The nominal voltage of the machine (expressed in V).

11. The commercial name of the machine, and the manufacturer's address.

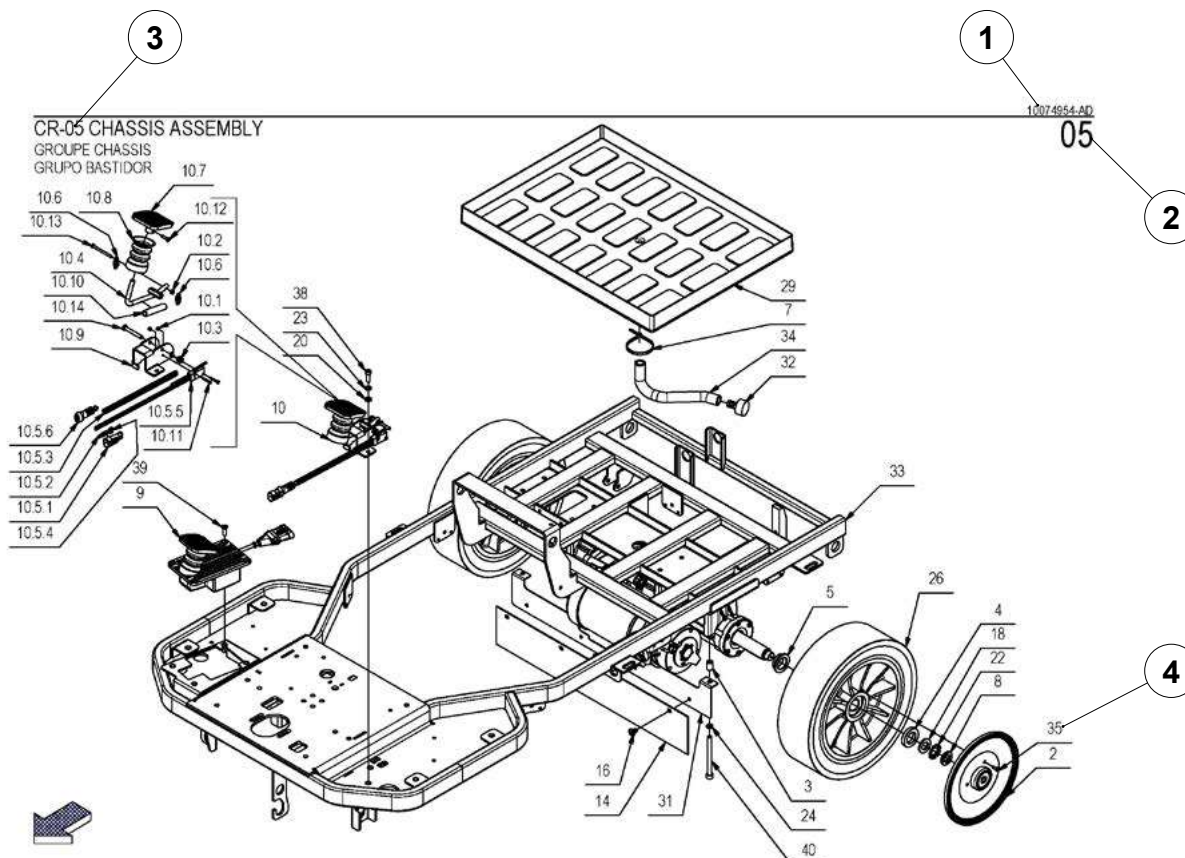

ATTENTION: it is strictly forbidden to remove or tamper with the serial number plate.

COMMENT LIRE LES TABLES DES PIÈCES DE RECHANGE

Ce document contient les tables des pièces de rechange.

Pour les consulter correctement, lire la légende fournie ci-dessous :

1. NUMÉRO DE DOCUMENT - VERSION : identifie le numéro de document et la version de la table des pièces de rechange représentée.
2. NUMÉRO DE LA TABLE : identifie le numéro représentatif des groupes principaux dans lesquels la machine a été divisée.
3. TITRE DE LA TABLE : identifie le titre de la table représentée.
4. POS : identifie la position de la pièce dans la table des codes.

5.  : indique le symbole graphique qui permet d'identifier si la pièce associée est un ensemble composé de plusieurs éléments ou s'il s'agit d'un élément individuel.

REMARQUE :

↓	indique que la pièce associée est un ensemble composé de plusieurs pièces.
↑	indique que la pièce associée fait partie d'un ensemble.

6. POS : identifie la position de la pièce dans la table des codes.

REMARQUE : si le numéro est marqué avec le symbole « . », il identifie une pièce qui compose un ensemble avec d'autres pièces.

↓	1	dans ce cas, la position identifie un ensemble (Niv-01) composé de plusieurs pièces.
↑↓	1.1	dans ce cas, la position identifie une pièce (Niv-02) de l'ensemble supérieur, mais il s'agit également d'un ensemble composé de plusieurs pièces.
↑↑↑	1.1.1	dans ce cas, la position identifie une pièce (Niv-03) de l'ensemble intermédiaire (Niv-02).

REMARQUE : si le numéro est marqué avec le symbole « * », il identifie une pièce obsolète.

7. BULLETIN TECHNIQUE : indique le numéro de document d'un bulletin technique qui décrit une modification technique associée à la pièce.

8. NUMÉRO DE SÉRIE : indique le numéro de série de la première machine produite avec la modification technique indiquée dans le bulletin technique associé.

REMARQUE :

→123456789	Si la flèche est située avant le numéro de série, elle indique que la pièce associée est valable jusqu'au matricule indiqué.
123456789→	Si la flèche est située après le numéro de série, elle indique que la pièce associée est valable à partir du matricule indiqué.
123456789 → 123456789	Si la flèche est située entre deux numéros de série, elle indique que la pièce associée est valable uniquement pendant un laps de temps identifié entre les deux matricules indiqués.

9. CODE : identifie la référence numérique avec laquelle est identifiée la pièce de rechange associée.
 10. QTÉ : identifie la quantité de la pièce de rechange utilisée pour le groupe illustré.
 11. NOM : identifie le nom avec lequel est identifié le groupe représenté dans la table des pièces de rechange.
 DESCRIPCION : identifie la description en espagnol de la pièce de rechange associée.
 DESCRIPTION : identifie la description en français de la pièce de rechange associée.
 DENOMINATION : identifie la description en anglais de la pièce de rechange associée.
 DESCRIZIONE : identifie une description plus détaillée en italien de la pièce de rechange associée.

12. FENÊTRE LOUPE : permet d'afficher les pièces de rechange disponibles pour la pièce indiquée.

REMARQUE : ces composants seront représentés comme des éléments individuels faisant partie d'un ensemble, et seront donc identifiés par le symbole « . ».

13. FENÊTRE TEMPORELLE : permet d'afficher les pièces qu'une modification technique a rendu obsolètes.

REMARQUE : pour faciliter la lecture de la fenêtré temporelle, le numéro de série concernant la modification représentée y est également reporté, cependant dans la table des codes il est possible de visualiser dans la colonne BULLETINS TECHNIQUES le numéro du document où la modification est expliquée.

PLAQUE MATRICULE

Les descriptions contenues dans cette publication ne sont pas contractuelles.

La société se réserve donc le droit d'apporter, à tout moment, d'éventuelles modifications aux organes, pièces, accessoires qu'elle jugera nécessaires pour une amélioration ou toute autre exigence de caractère constructif ou commercial.

La reproduction même partielle des textes et des dessins contenus dans cette publication est interdite par la loi. La société se réserve le droit d'apporter des modifications à caractère technique et/ou relatives aux équipements.

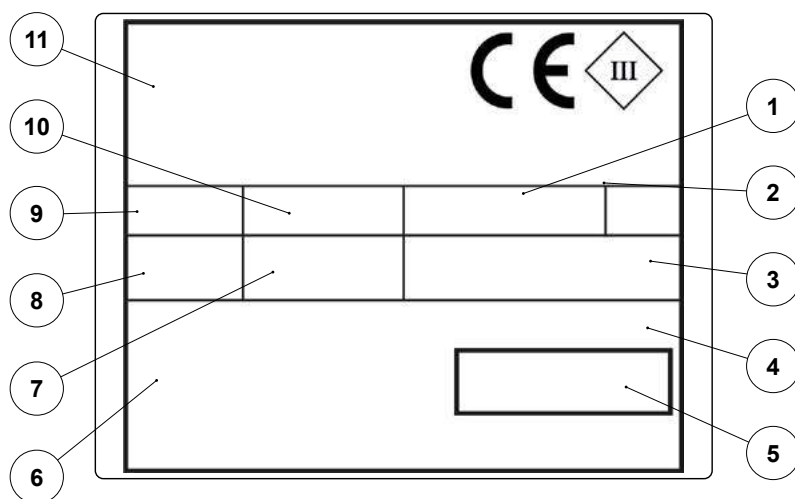

Les images sont fournies à simple titre d'exemple et ne sont pas contraignantes pour le design et les équipements.

Le catalogue des pièces de rechange se compose d'une série d'illustrations et de listes correspondantes de pièces de rechange. Les illustrations montrent les pièces de rechange pour chacun des GROUPE PRINCIPAUX dans lesquels la machine a été divisée.

Les groupes principaux sont à leur tour subdivisés en FIGURES et les figures en une ou plusieurs ILLUSTRATIONS ou LISTES. Chaque illustration est identifiée par un numéro séquentiel et le nom du groupe illustré (par ex. CR-01 GROUPE CARTER).

Dans l'illustration, toutes les pièces de rechange sont identifiées par un numéro de position.

AVERTISSEMENT : lors du remplacement des pièces de rechange, il est recommandé d'utiliser uniquement des PIÈCES DE RECHANGE D'ORIGINE. Il est conseillé de ne pas attendre que les composants soient usés par l'utilisation, remplacer un composant au bon moment signifie un meilleur fonctionnement de la machine et en même temps des économies dues au maintien d'une machine efficace.

La plaque matricule est positionnée sur la machine, elle indique les caractéristiques générales de la machine, en particulier le numéro de série de la machine. Le numéro de série est une information très importante qui doit toujours être fournie en même temps que toute demande d'assistance ou d'achat de pièces de rechange. Les indications suivantes peuvent être lues dans la plaque signalétique :

1. La valeur exprimée en kg du poids des batteries d'alimentation de la machine.
2. L'indice de protection IP de la machine.
3. La valeur en kg du poids brut de la machine.
4. Le code d'identification de la machine.
5. Le numéro de série de la machine.
6. Le nom d'identification de la machine.
7. La valeur exprimée en W de la puissance nominale absorbée par la machine.
8. La valeur exprimée en % de la pente maximale franchissable lors du travail.

9. L'année de fabrication de la machine.

10. La valeur exprimée en V de la tension nominale de la machine.

11. Le nom commercial et l'adresse du fabricant de la machine.

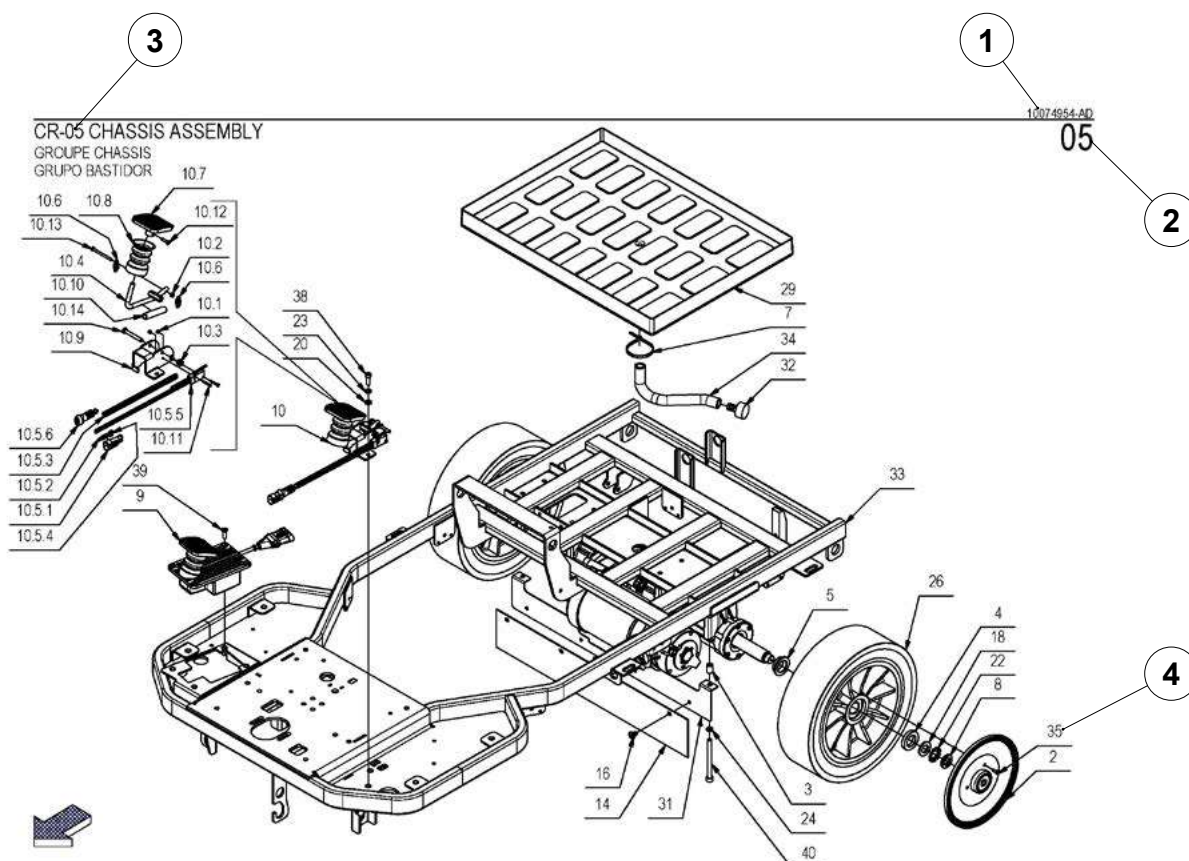

ATTENTION : il est strictement interdit de retirer ou d'altérer la plaque matricule.

CÓMO LEER LAS TABLAS DE LOS REPUESTOS

Este documento contiene las láminas de los repuestos.

Para consultarlas correctamente, lea la leyenda que figura a continuación:

1. NÚMERO DE DOCUMENTO - VERSIÓN: identifica el número de documento y la versión de la lámina de repuestos representada.
2. NÚMERO DE LA TABLA: identifica el número de representación de los grupos principales en los que se ha subdividido la máquina.
3. TÍTULO DE LA TABLA: identifica el título de la tabla representada.
4. POS: identifica la posición de la pieza dentro de la tabla de códigos.

5. : lleva el símbolo gráfico que permite identificar si la pieza asociada es un conjunto formado por varios elementos o si se trata de un solo elemento.

NOTA:

↓	indica que la pieza a la que está asociada es un conjunto formado por varios elementos.
↑	indica que la pieza asociada forma parte de un conjunto.

6. POS: identifica la posición de la pieza dentro de la tabla de códigos.

NOTA: si el número está marcado con el símbolo ".", identifica una pieza que, junto con otras piezas, constituye un conjunto.

↓	1	en este caso, la posición identifica un conjunto (Liv-01) formado por varias piezas.
↑↓	1.1	en este caso, la posición identifica una pieza (Liv-02) del conjunto superior, pero también es un conjunto compuesto por varias piezas.
↑↑↑	1.1.1	En este caso, la posición identifica una pieza (Liv-03) del conjunto intermedio (Liv-02).

NOTA: si el número está marcado con el símbolo "*" identifica una pieza obsoleta.

7. TECHNICAL NEWS: indica el número de documento de una "technical news" donde se describe una modificación técnica asociada a la pieza.

8. SERIAL NUMBER: indica el número de serie de la primera máquina fabricada con la modificación técnica notificada en la "technical news" correspondiente.

NOTA:

→123456789	Si la flecha está situada antes del número de serie, indica que la pieza asociada es válida hasta el número de serie indicado.
123456789→	Si la flecha se sitúa después del número de serie, indica que la pieza asociada es válida a partir del número de serie indicado.
123456789 → 123456789	Si la flecha está situada entre dos números de serie, indica que la pieza asociada solo es válida durante un periodo de tiempo identificado entre los dos números de serie indicados.

9. CÓDIGO: identifica el número de referencia con el que se identifica la pieza de repuesto asociada.
 10. CANTIDAD: identifica el número de piezas de repuesto utilizadas para el grupo ilustrado.
 11. DENOMINACIÓN: es el nombre con el que se identifica el grupo representado en la lámina de repuestos.
 DESCRIPCIÓN: identifica la descripción en ESPAÑOL de la pieza de repuesto asociada.
 DESCRIPTION: identifica la descripción en FRANCÉS de la pieza de repuesto asociada.
 DENOMINATION: identifica la descripción en INGLÉS de la pieza de repuesto asociada.
 DESCRIZIONE: identifica una descripción más detallada en ITALIANO de la pieza de repuesto asociada.

12. VENTANA DE LA LUPA: muestra las piezas de recambio disponibles para la pieza señalada.

i **NOTA:** estos componentes se representarán como elementos individuales que forman parte de un conjunto y, por lo tanto, se identificarán con el símbolo ".".

13. VENTANA TEMPORAL: permite ver las piezas que han quedado obsoletas debido a una modificación técnica.

i **NOTA:** Para facilitar la lectura de la ventana temporal, también se incluye el número de serie inherente a la modificación representada. En cualquier caso, en la tabla de códigos se puede ver, en la columna TECHNICAL NEWS, el número de documento en el que se explica la modificación.

PLACA DE LA MATRÍCULA

Las descripciones contenidas en esta publicación no se consideran vinculantes.

Por tanto, la empresa se reserva el derecho de aportar en cualquier momento las eventuales modificaciones en piezas, detalles, suministros de accesorios, que considere convenientes para una mejora o debido a cualquier exigencia de carácter constructivo o comercial.

La reproducción, incluso parcial, de los textos y de los diseños contenidos en esta publicación está prohibida por la ley. La empresa se reserva el derecho de aportar modificaciones de carácter técnico y/o de equipamiento.

Las imágenes utilizadas son de simple referencia, y no están vinculadas al diseño y/o al equipamiento.

El catálogo de piezas de recambio consta de una serie de ilustraciones y sus correspondientes listas de piezas de repuesto. Las ilustraciones muestran las piezas de repuesto de cada uno de los GRUPOS PRINCIPALES en los que se ha dividido la máquina.

Los grupos principales se subdividen, a su vez, en FIGURAS y las figuras en una o varias ILUSTRACIONES o LISTAS.

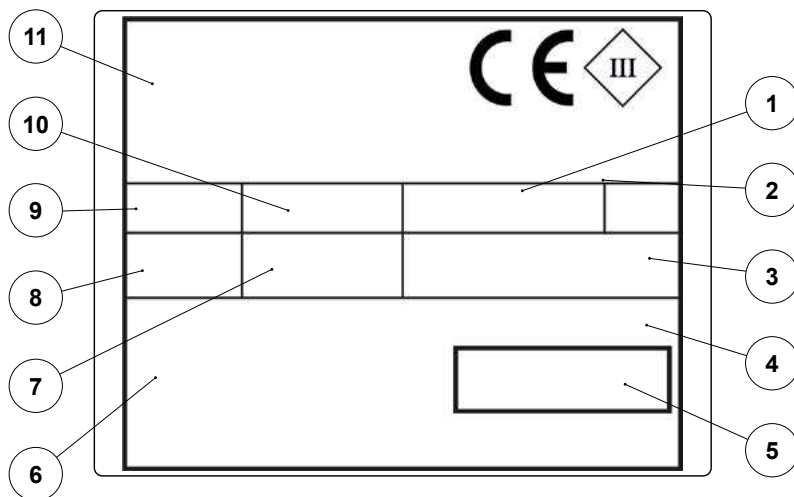

Cada ilustración está identificada por un número secuencial y el nombre del grupo ilustrado (por ej. CR-01 GRUPO BANCADA).

En la ilustración, todas las piezas de repuesto están identificadas con un número de posición.

ADVERTENCIA: cuando se sustituyan las piezas, se recomienda utilizar exclusivamente PIEZAS DE REPUESTO

ORIGINALES. Se recomienda no esperar a que los componentes se desgasten por el uso, la sustitución de un componente en el momento adecuado supone un mejor funcionamiento de la máquina y, al mismo tiempo, un ahorro ya que la máquina trabaja en condiciones de funcionamiento óptimas.

La placa de la matrícula está colocada en la máquina y contiene las características generales de la máquina, especialmente el número de serie. El número de serie es una información muy importante que se debe comunicar en cualquier pedido de asistencia o compra de piezas de repuesto. En la placa de la matrícula se puede leer la siguiente información:

1. El valor indicado en Kg del peso de las baterías de alimentación de la máquina.
2. El grado de protección IP de la máquina.
3. El valor en Kg del peso bruto de la máquina.
4. El código de identificación de la máquina.
5. El número de serie de la máquina.
6. El nombre de identificación de la máquina.
7. El valor expresado en W de la potencia nominal absorbida de la máquina.
8. El valor expresado en % de la pendiente máxima

utilizada durante la fase de trabajo.

9. El año de fabricación de la máquina.

10. El valor de la tensión nominal de la máquina, expresado en V.

11. El nombre comercial y la dirección del fabricante de la máquina.

ATENCIÓN: está absolutamente prohibido quitar o manipular la placa de matrícula.

FIMAP S.p.A.
